Polyester fiber material has various densities and good air permeability. It is an ideal product in sound absorption and heat insulation materials. The maximum sound absorption coefficient is above 0.8 in the noise range of 125~4000hz. As an indoor sound-absorbing material, it can effectively shorten the reverberation time, absorb excess reverberation, improve hearing regulation, and improve language clarity. Therefore, polyester fiber sound-absorbing board is widely used in the field of architectural decoration.
