Polyglycolide (PLGA) is also known as polylactic acid-glycolic acid copolymer, polylactic acid-glycolic acid copolymer. It is a kind of functional macromolecular organic compound which is degradable by the random polymerization of two kinds of monomeric lactic acid and glycolic acid. It has good biocompatibility, non-toxicity, good capsular and film forming properties, and is widely used. Used in pharmaceutical, medical engineering materials and modern industrial fields. In the United States, PLGA passed the FDA certification and was officially included as a pharmaceutical excipient in the US Pharmacopoeia.
