Abstracts

Polypropylene strapping is the lightest and most economical strapping material. It is commonly used for light- to medium-duty applications such as carton closing, paper or newsprint bundling, and bailing or unitizing lightweight materials and products. It is easy to work with, very flexible, and resistant to water and corrosive liquids. It also has a high elongation rating (meaning it's pretty stretchy), which allows it to withstand shocks and move with a load without breaking.
