## Abstracts

Polysiloxane coatings are industrial protective and maintenance coatings that used in services characterized by abrasion, chemicals, extreme UV and high temperatures. The term polysiloxane refers to a polymer with a silicon-oxygen backbone. The silicon-oxygen backbone is much more resistant to the effects of UV radiation than the carbon-carbon backbone of organic polymers. Polysiloxanes have excellent aesthetic weathering attributes in terms of gloss retention and chalk resistance properties. They exhibit excellent abrasion and corrosion resistance, good chemical resistance, good anti-graffiti properties, resilience to dirt pickup and are formulated with low VOC's.
