PTC Heating Elements consist of PTC thermistors and aluminium strips joined by brazing or gluing. The PTC element can be mounted in a frame of heat-resistant plastic or integrated a specific application.

PTC Heating Elements provide a number of advantages, including fast and even heating of the element without variation in the power, even with high airflows. They are self-regulating and have a long working lifetime. There is no risk of overheating. PTC technology is also used in tubular elements and flexible elements.
