Abstracts

Post-acute care (PAC) includes rehabilitation or palliative services that beneficiaries receive after, or in some cases instead of, a stay in an acute care hospital. Depending on the intensity of care the patient requires, treatment may include a stay in a facility, ongoing outpatient therapy, or care provided at home. It can be targeted at different groups including children, adults and the elderly. And it can manage patients' post-hospital discharge throughout the entire care continuum to reduce risk for adverse patient outcomes, waste, and additional costs.
