Feed acidifying agent, synonymous with acidifying agent, feed acidifying agent is an important additive alongside antibiotics, probiotics, enzyme preparations, microecological preparations, etc. It is an environmentally friendly additive with no residue, no resistance, and no toxic effect. Feed acidifier, as a new type of additive that can reduce the pH value of feed in the digestive tract and provide animals with the most suitable digestive tract environment, has the effect of improving digestive tract enzyme activity and nutrient digestibility, and can reduce the chance of pathogenic microorganism infection, so that the reproduction of diseased microprotozoa is inhibited, and probiotics reproduce. Has been widely used at home and abroad, acidifiers are widely used in poultry, piglets, beef cattle, dairy cows, sheep and other animal feed.
