Abstracts

Prefabricated bathroom pods are fully functional bathrooms; the key difference being that they are designed and built offsite, rather than on a traditional building site as part of a construction project.

Useful for commercial applications in particular, bathroom pods are built in an offsite factory as a completed unit, and are then fully tested and fitted with all of the required fixtures and fittings such as taps, rails, mirrors, and appliances. The pods are then simply delivered to the site for installation, where they are connected to the plumbing and electrical services.
