Abstracts

Pressure Sensitive Tape is an adhesive tape that will stick with application of pressure, without the need for a solvent (such as water) or heat for activation. Pressure-sensitive labels are analogous to a high-tech sticker. They can use paper, film and foil as their primary label materials and can be used with a wide range of inks. Since they don't require any heat, solvent or water to activate, it only takes light or moderate pressure to apply (or stick) them to a product surface. They come on rolls to be peeled off and pressed onto a product using a hand or machine-applied technique.
