Abstracts

Probiotics are the combination of live bacteria or yeast that lives naturally in our bodies. There are commonly two types of bacteria that go in our bodies i.e. good bacteria and bad bacteria. Probiotics belong to good bacteria that have several characteristics such as being isolated from a human, surviving in the small intestine after ingestion (being eaten), Having a proven benefit to you, and being safely consumed. These bacteria after entering live in the places that are the human gut most probably in the large intestines. Probiotic dietary supplements are rich sources of bacteria and yeast such as Lactobacillus, Bifidobacterium, and Saccharomyces Boulardii that help in enhancing the immune system and also control the inflammation in the body. The probiotic dietary supplements are present in the form of powdered stick packs, capsules, tablets, and probiotic drops that are usually used in foods and nutritional supplements, infant formulas, and animal feed. The rising concerns of gastrointestinal ailments, such as irritable bowel syndrome, inflammatory bowel disease, diarrhea, Yeast infections, Gum disease, Eczema, Sepsis, and irritable bowel syndrome (IBS) across the world are driving the market growth. The probiotic dietary supplements help in food digestion and help in keeping bad bacteria from getting out of control and being disease-free, it creates vitamins, support the cells that line the gut for preventing bad bacteria that entering the body through the foods or drinks, and help in medicine breakdown and absorption.
