Abstracts

Property Inspection Software is a unified cloud computing and mobile workforce application that allows field operatives in various industries to inspect and report on properties using a smartphone or tablet.

The ability to upload photos, video and comments makes this technology a remarkable time-saver for inspectors, as they relay reporting information back to managers, support staff and property owners via the cloud.

Digital home inspections ultimately save time, money and help build trust with property owners by providing professional easy-to-read inspection reports.
