Quartz Crucibles and Lids are made of high purity quartz. There are two technologies to produce Quartz Crucibles and Lids, slip casting and arc-fusion. In this report, we only statistic quartz crucible manufactured by arc-fusion. Fused Quartz also offers a number of unique properties that make it ideal in a variety of applications where other materials prove to be problematic. These properties include: extremely high purity, high softening temperature (1670°C), optical transparency over a wide range, low thermal expansion, excellent thermal shock, and resistance to a large number of elements and compounds.
