Abstracts

Rebounder is a type of trampoline. Rebounding exercises work on every cell of the body in a unique way. It is a fun way to improve cell energy and mitochondrial function. Rebounding benefits our skeletal system. Weight bearing exercises help in increasing bone density. Jumping on a rebounder increases the weight supported by bones due to increased G-force of jumping. Buy Rebounders of various styles to perform various exercises and achieve your fitness goals in a fast and effective manner.
