Abstracts

Rechargeable lithium ion batteries is a type of rechargeable battery. Lithium-ion batteries are commonly used in portable electronics and electric cars and are increasingly popular in military and aerospace applications. The lithium ions in the battery move the electrodes from the negative electrode to the positive electrode through the electrolyte while charging, and the back. Lithium-ion batteries use embedded lithium compounds as anode materials, and typically use graphite as cathode materials. It has high energy density, no memory effect and low self - discharge.
