Abstracts

Reclaimed timber is processed wood retrieved from its original application for purposes of subsequent use. Most reclaimed timber comes from timbers and decking rescued from old barns, factories and warehouses. High cost of the product as compared to virgin timber owing to its processing cost may limit its growth. Furthermore, processing of the product is likely to involve significant time and efforts, along with deconstruction, transportation, and storage costs.

This report contains market size and forecasts of Reclaimed Timber in global, including the following market information:
