Abstracts

Recruitment Chatbot, also known as conversational agent, is a type of software designed to mimic human conversational abilities during the recruiting process. A recruitment chatbot is a platform that uses numerous digitized dialogs in order to create live communication through instant messengers. Recruitment chatbots are employed to convey assured information to a large number of applicants in order to provide answers to questions, or to gather specific information from the candidates. Furthermore, recruitment chatbots are used by HR teams in organizations or enterprises to reduce the time taken for the entire recruitment process.
