Abstracts

For every 100 calories, if the product has 3 grams of fat or less, it's a low-fat product. This means 30% or less of the calories come from fat. Foods like margarine, mayonnaise, and some salad dressings that get most of their calories from fat must have half or less than half the fat of the regular version of the food to be called "light." These foods don't have to meet the 30% cutoff for number of calories from fat to be considered low-fat. (See "Other foods" below.)
