## Abstracts

The resource scheduling market consists of vendors offering technologies that support various aspects of scheduling for corporate facilities such as meeting rooms, conference spaces, offices, and desk 'hoteling.' These applications may also include scheduling of other services such as catering and visitor management. Resource scheduling applications allow organizations to support large and mobile workforces with a smaller real-estate footprint without sacrificing employee productivity. These applications simplify the process of finding an available space, determining which amenities are provided, booking the space and providing other services.
