Abstracts

Restaurant POS Software includes table reservation, material management, kitchen display system, helpful in the Restaurant Management. Restaurant point of sale (POS) software provides restaurant and bar servers an easy way to take orders and process payment for multiple checks simultaneously. With POS software, restaurant managers and owners can meet many of their practical business needs, from managing daily service all the way up to high-level analytics. Orders can be entered either at touchscreen stations or tableside with mobile devices, and servers can easily keep track of their tables, edit orders, easily split checks, and apply discounts. Some products allow communication between servers and the kitchen, allowing them to be aware of inventory shortages and delays. By empowering servers with software that can provide myriad services, they can be more efficient and accommodating for customers. Many products are meant to be used on mounted tablets or other handheld devices, and can include ticket printers or cash drawers. Managers can also keep track of profits, inventory, menu trends, and other analytics.
