## Abstracts

The shoplifting problem is one of the biggest issues retailers have to deal with on a daily basis. No matter the type of merchandise you sell, there are people who will try to steal from you if you give them the opportunity to do so – which is what not investing in good security measures does.

Anti-theft systems protect valuables such as vehicles and personal property like wallets, phones, and jewelry. They are also used in retail settings to protect merchandise in the form of security tags and labels. Anti-theft systems include devices such as locks and keys, RFID tags, and GPS locators.
