Abstracts

In today's complex supply chains, it is critical that crates, containers, pallets, ULDs, IBCs, or any other reusable packaging are available when and where they are needed. Moving too many into the wrong location is a serious waste of time, money, and resources.

Container and reusable packaging management is most efficient when its four core topics - demand forecast, tracking, distribution, and transport - are integrated into one process. Reusable packaging management software combines these four areas and optimizes the use of loading equipment for more efficiency.
