## Abstracts

Rosehips are the fruit of a rosebush. When roses die and are left on the bush, they leave behind bright reddish-orange, spherical fruit. The tiny edible fruits are thought to pack a powerful medicinal punch.

Rosehip oil contains vitamin C and vitamin A. It also contains essential fatty acids such as oleic acid, palmitic acid, linoleic acid and gamma linolenic acid. It is also a good source of vitamin F, a fatty acid made of linoleic acid and alpha-linoleic acid.

Rosehip oil is a powerful source of antioxidants and keeps skin supple. It is an alternative and complementary medicine, so there aren't many studies proving its effectiveness. Anecdotal evidence supports its value as a safe skin care product.
