## Abstracts

A Golf Launch Monitor is an electronic device that measures aspects that happen to a golf ball when it's being struck by a golf club. Its main function is to measure some of the action parameters of your swing, and to perform some quantitative analysis of your swing through some complex calculations, such as swing speed, ball speed, and so on. Golf Launch Monitors can provide data that you just can't find anywhere else, and as you already know that in today's world, data is a huge part of improving your game as a golfer.

The Golf Launch Monitor industry can be broken down into several segments, Personal-Grade Launch Monitor, Professional-Grade Launch Monitor, etc.
