Abstracts

Rust Buster is a water-based solution containing penetrants and a polymeric barrier coating that chemically neutralizes rust into a neutral, organic protective coating. Dried RUST BUSTER is an excellent primer for all types of industrial and automotive topcoats. This product is less toxic than most latex paints, and may be used safely indoors or outdoors. It converts iron oxide into a black protective coating that seals out moisture and prevents further corrosion. This tough primer extends paint life up to five times longer than normal.
