Sales content tools are content repositories or hubs that enable content sharing (internal and external) for sales teams. They are sometimes called sales enablement or sales content management systems. Sales content tools are frequently used to align marketing and sales messaging, maintain brand consistency, collaborate on sales content, and deliver content (such as presentations, white papers, etc.) to prospects during the sales cycle. Some sales content tools assist with content personalization or track content performance to make intelligent recommendations about which content to use and/or when to use it with a particular opportunity.
