Abstracts

Sales mapping software gives sales teams customizable maps to manage customer and prospective client locations across a large geographic area, including contact and demographic details for customers, established territories for each sales person, and collaboration tools.

Mobile sales people can use the system to plan out their day of appointments and generate an optimized route with turn-by-turn directions to meet with as many valuable customers as possible each day.

Many systems also include mobile accessibility through a native app or via an internet browser on a smartphone or tablet. This allows salespeople in the field to collaborate with managers at the main office, and adapt routes and information to client schedules quickly.

This report contains market size and forecasts of Sales Mapping Software in Global, including the following market information:
