## **Abstracts**

SBR styrene-butadiene latex cement concrete is a stable emulsion synthesized by low temperature emulsion of butadiene and styrene. The product is specially developed according to the characteristics of modified cement concrete. It is used in construction, highway, railway, special bridge and oil well. And widely used in military facilities engineering. By adding SBR styrene-butadiene latex, it can significantly improve the temperature sensitivity, low temperature performance, viscosity, crack resistance and anti-aging properties of concrete.
