An SCC tester is fundamentally known as a slump cone concrete tester. An SCC tester is used for determining the workability and consistency of fresh concrete. One of its important functions is also to determine the water/cement ratio of a concrete mixture. An SCC tester is used to determine or to verify the superiority of a sample on the field or in a laboratory. An SCC tester detects the characteristics of fresh concrete. The test performed by an SCC tester is to determine the slump flow and the compacting time of fresh concrete.
