Abstracts

In a nutshell, the security lens types can be divided into security camera fixed lens (also called monofocal lens) and security camera varifocal lens.

The focal length of CCTV security camera fixed lens is permanently set, meaning the field of view of fixed lens security cameras cannot be changed. You need to decide whether a wide angle security camera lens or a narrow angle lens is most suitable in your situation.

On the contrary, the CCTV camera varifocal lens allows you to adjust the focal length for your specific needs, which is also typically more expensive than security cameras fixed lens.

This report studies the security lens market.
