Abstracts

Servers are a popular type of IT equipment, but they can also be quite costly. High-end computer equipment is mainly embodied in the form of server products, which are characterized by strong processing power, high reliability and good scalability. According to the processor architecture, servers can be divided into X86 servers and non-X86 servers. According to the number of processors, they can be divided into single-socket, dual-socket and multi-socket servers. According to the shape and structure of the server, it can be divided into tower type, rack type and whole cabinet server.

This report contains market size and forecasts of Servers in global, including the following market information:

Global Servers Market Revenue, 2017-2022, 2023-2028, ($ millions)

Global Servers Market Sales, 2017-2022, 2023-2028, (K Units)
