Abstracts

Shadow Mask is the one of most important factors for patterning AMOLED pixels, and it is getting more important as the panel resolution & fab generation rises. Panel makers usually have a main supplier of fine metal mask, and they are also evaluating the second supplier's for increasing PPI.

Currently, DNP is the strongest supplier of FMM and has supplied them to SDC since 2010. SDC has improved the cleaning & recycling FMM of FHD & less. SDC is focusing on QHD FMM rather than FHD & less, and will impact the shipment of FMM. So, AMOLED shadow mask market is expected to show the different status by resolution & panel supplier.
