## Abstracts

Sheet moulding composite or sheet moulding compound (SMC) is a ready to mould glass-fibre reinforced polyester material primarily used in compression moulding. Sheet moulding compound (SMC) is both a process and reinforced composite material. The composite is a “ready to mold” glass or carbon fiber reinforced polyester material primarily used in compression molding. The SMC sheets are manufactured by dispersing long strands of chopped glass fibers or carbon fibers on a bath of polyester resin, vinylester resin or epoxy resin.
