## Abstracts

The shoe Heaters is designed to be compatible with most shoe materials such as leather, plastic, canvas, rubber, modern fabrics, fabrics and vinyl. These devices use less heat, which means that the heat generated is not hot enough to damage the glue and other materials that hold the shoes together. Shoe Heaters are very useful, especially for those who live in snowy or humid environments. It helps to remove bacteria and fungi that can cause our feet to stink and even become infected by athletes' feet.
