Sick Sinus Syndrome is a group disorder including three heart rhythm problems (arrhythmias): sinus bradycardia (a slow heart rate), tachycardias (fast heart rates), and bradycardia-tachycardia (alternating slow and fast heart rhythms). Atrial fibrillation, atrial flutter/tachycardia, and supraventricular tachycardia are various types of tachycardia. The disorder is the result of a number of heart conditions that may cause scarring, degeneration, or damage to the heart. Heart attack, idiopathic degenerative disease, cardiovascular disease, high blood pressure, and structural defects in the heart are various diseases which may lead to sick sinus syndrome.
