Abstracts

The portal frame, the lifting mechanism and the fork of the side loading forklift are located in the middle of the forklift truck and can move along the lateral guide rail. The fork is located on the side of the forklift truck with a cargo platform on the side. When the fork along the gantry goes up to a height greater than the cargo platform, the gantry retracts along the guide rail to lower the fork, and the goods are placed on the cargo platform of the forklift. The portal frame and fork of the side forklift truck are on the side of the truck body. The car body enters the passage, the goods fork faces the shelf or the stack, the loading and unloading operation does not have to turn first then the operation.
