Abstracts

The material of the silent oil-free air compressor itself does not contain oily substances, and there is no need to add any lubricating oil during operation, so the quality of the discharged air is greatly improved, and the safety of the supporting equipment required by the user is also guaranteed. Due to the large amount of oil molecules in the exhaust gas, it will bring different degrees of corrosion to the equipment matched by the user. The equipment does not add a drop of oil, so basically the user does not need to spend time on maintenance.
