Silicon Carbide Roller has the characteristics of high temperature bearing capacity, excellent high temperature flexural strength, oxidation resistance, strong wear resistance, long-term high temperature cracking, non-bending deformation and so on. Silicon carbide roller is generally used in roller kilns with firing temperatures above 1300 C. Silicon carbide rollers are easy to maintain and have high bearing capacity. After long-term use, silicon carbide roller is not broken, do not bend or deform, high flexural strength. Service life for this kind of silicon carbide ceramic is ten times of the alumina ceramic material.
