Silicone masterbatches are white pellets, formed by 30% to 50% ultra-high molecular weight siloxane polymer dispersed in all kinds of thermoplastic resin, such as PE, PP, used in carrier resin compatible system in order to improve the flow of resin and processing (better mold filling & mold release, less extruder torque, faster throughput), and modify surface properties (better surface quality, lower COF, greater abrasion & scratch resistance). Silicone masterbatch additives for improved plastics processing.
