Abstracts

Small appliances are semi-portable or portable machines, basically used on platforms such as counter-tops and table tops in order to accomplish a certain household task. Examples of small appliances include coffee makers, humidifiers, toasters, and microwave ovens, among many others. They were made in contrast with chief appliances such as washing machine and refrigerator, which cannot be easily displaced and are basically set on the floor. Small appliances also distinct from consumer electronic goods, which are mainly for entertainment and leisure other than for completely practical use. Some of the small appliances perform almost the similar task as their bigger counterparts. For instance, a toaster oven is the small appliance counterpart of oven and performs the same task as the oven. Small appliances are often known to have a commercial and home version as well as home version, for instance blenders, food processors, and waffle irons.
