Abstracts

Smart helmets are embedded with sensors and additional mounted devices that collect data and information as well as assist users. Smart helmets are increasingly being used by motorcyclists and bicyclists, apart from their use by industrial workers and firefighters. Smart helmets consist of action cameras and GPS navigation systems that assist users. Smart helmets are used to protect users from any head injury. These helmets are powered by augmented reality and a robust sensor package. Smart helmets enhance situational awareness and improve efficiency by offering more information to users.
