A cohesive bandage (coban) or self-adhering bandage is a type of bandage that coheres to itself but doesn't adhere well to skin, hair or other materials. Cohesive bandage is woven in a way that allows for maximum stretch giving it a bumpy in texture and feel, similar to 'chicken skin'.

Coban is commonly used as a wrap on limbs because it will stick to itself and not loosen. Due to its elastic qualities, coban is often used as a compression bandage.

It is used both on humans and animals. For animal use, it is marketed under a variety of trade names such as 'Vetrap' by 3M. It is commonly used on horses and other animals because it will not stick to hair so it is easily removed.
