A Surface Mount Device (SMD) is any device that is packaged in a way that allows the leads to be soldered directly onto the pads on the surface of a circuit board. The OCXO is an oscillator which is temperature controlled (ovenized crystal controlled oscillator). This type of oscillator has a temperature controlling circuit to maintain the crystal and key components at a constant temperature. OCXOs are typically used when temperature stabilities on the order of $\pm 1 \times 10^{-8}$ or better are required.
