Abstracts

Snow goggles, or ski goggles, are essential for winter sporting activities like skiing and snowboarding. These goggles protect skiers and snowboarders from the harmful ultraviolet (UV) rays and come equipped with double lenses, anti-fog coatings, and good venting facilities. Since the lenses are large, these goggles offer a wider field of view and excellent peripheral vision. Most snow goggle frames are manufactured using soft, flexible materials like nylon, rubber, and propionate materials as they do not become brittle in the cold and offer better protection against face injuries.
