Abstracts

Solar panels are devices that convert light into electricity. A solar panel is a collection of solar cells spread over a large area, which function together to produce power. Solar panel coatings are defined as coatings applied on solar panels to protect them from dust, dirt, and external harsh environment. Solar panel coatings are deposited on solar panels at the time of manufacture of these panels. Solar panel coatings increase the efficiency and protection level of solar panels, resulting in higher energy generation through solar panels.
