Soldermask is a protective layer of liquid photo image able lacquer applied on the TOP and BOTTOM side of a Printed Circuit Board. The function of the Soldermask is to protect the copper, apart from the solder pads, from:

? oxidation

? creating shorts during soldering (bridges)

? creating shorts during operation due to external conductive influences

? creating shorts during operation from net to net due to high Voltage spikes

? environmental influences like dust and other contaminations that may create shorts in the long run
