Abstracts

Soy products are made of soybean. They are a substitute for dairy-based milk and milk products such as cheese, flavored milk, yogurt, and spreads. Soy products act as a substitute for meat products and are best suited for vegan consumers. Soy processing needs the correct amount of moisture, temperature, and time, and correct processing helps in providing a pure soybean end-product. De-hulling soybeans renders a better-quality soy than non-dehulled soy.
