Speed Changer, Industrial High-Speed Drive, and Gear manufacturing market includes companies mainly involved in manufacturing industrial high-speed drives (except hydrostatic) automotive power transmission equipment gears and speed changers. Speed changers are the devices which changes the speed of vehicles such as gears and shafts. Gear is a rotating machine that enables the transmission of torque through meshing of cut teeth or cogs with another toothed part or rack. High speed drives offer decreased installation space for higher power and unnecessary gearboxes. These components are used primarily in mechanical power transmissions for industrial machines.
