An elastic sensitive element for measuring pressure by bending or torsional deformation of Stripped and Housed Bourdon Tube, The bourdon tube is fixed at one end and movable at the other. The bourdon tube is the measuring element form of the pressure gauge and can be installed on the tee, but there is also a stop valve between the pressure gauge and the pressure gauge. Stripping and encapsulating the bourdon tube provides higher pressure than most other pressure switch technologies with a built-in overtravel stop that allows easy setting points to be adjusted with internal adjusting screws.
