Abstracts

Styrene-butadiene latex is prepared by emulsion copolymerization of butadiene and styrene. There are different grades according to the ratio of styrene to butadiene. According to the different temperature of emulsion copolymerization there are high temperature (50?) styrene-butadiene latex and low temperature (5?) styrene-butadiene latex, the latter performance is better than the former, the latter high strength, good cold resistance. Styrene-butadiene latex adhesive heat resistance and aging resistance are better than natural latex adhesive, even after aging will not be sticky, not softening,
