Abstracts

Sugar beet is a root vegetable generally used to produce sugar. Being rich in nutrients and low in fat and calories, sugar beet is used in low calorie and reduced fat diet. Companies involved in the production of sugar using sugar beet are also using sugar beet by-product known as dried beet pulp which is left when sugar is extracted from the sliced sugar beet. This by-product is being provided in many forms such as molasses dried, pelleted, and plain dried. Manufacturers are supplying this by-product as a livestock feed. Meanwhile, beet molasses is being used for producing chemicals, yeast, and pharmaceuticals.
